B Helps A & CANNOT #3: Multi-Draw Person-Fit Sign Flip (l_z) and High-a_j^{pop} CAT Selection Bias

A. Theorem 2: The $l_z^{(1)} = +2.24 \to l_z^{(32)} = -482$ Person-Fit Sign Flip

B. CANNOT #3: Why High-a_j^{pop} Adaptive CAT Loses by $n = 100$
